EDUCATION

SRM Institute of Science and Technology

B.Tech in Computer Science – Big Data Analytics, CGPA: 8.37

Chennai, India

Aug. 2023 – May 2027

EXPERIENCE

Developer Intern

Maya Appliances India

Jul. 2025 – Mar. 2026

India

- Developed supplier dashboard managing 1000+ suppliers for Purchase Orders, GRN, Quality ratings, and Delivery tracking using Java, React.js, Node.js, SQL, and RESTful APIs
- Collaborated with cross-functional teams to streamline supplier operations and improve business efficiency by 30%

Project Intern

IQNet Solutions

Jun. 2025 – Jul. 2025

India

- Built enterprise web application using HTML/CSS/Java/PHP/SQL; automated data extraction, cleansing, and transformation via Python scripts; authored API specs and system documentation

PROJECTS

PrivaRisk – Hackathon Project | Python, LLM, RAG, ChromaDB

2026

- Built air-gapped LLM fine-tuned on finance datasets; implemented RAG pipeline with ChromaDB (sub-100ms queries) for fraud detection and risk attribution; built KPI dashboards with Power BI

PathForge AI – Adaptive Learning Roadmap Planner | LLM, NLP, Python

2025

- Built AI-driven roadmap system generating goal-oriented learning plans with step-by-step workflows; integrated quiz-based progress tracker for performance evaluation

Asset Management System | HTML, CSS, JavaScript, PHP, SQL, Python

2025

- Built asset tracking system with CRUD, role-based access control, and SQL optimization; designed 40+ test cases and performed data analysis using Excel and Pandas

PCB Defect Detection | Python, YOLOv5, OpenCV, Deep Learning

2024

- Developed automated computer vision system to detect and localize 6 PCB manufacturing defects using YOLOv5, enabling real-time defect identification to reduce manual inspection effort

ACHIEVEMENTS & LEADERSHIP

- **Event Management Head, Datarix 2024** – Led end-to-end planning and execution of department technical symposium; coordinated with faculty, student teams, and vendors managing logistics and communication for 200+ participants
- **3rd Place – National Hackathon (Jeppiaar Institute)** – AI solution design and rapid prototyping; Rs. 3,000 Prize
- **LeetCode 50-Day Badge** – Solved 150+ problems in Python/Java covering data structures, dynamic programming, and system design
- **Certifications** – Power BI Certified, Microsoft Excel Certified; pursuing AWS Solutions Architect

TECHNICAL SKILLS

Languages: Java, Python, PHP, SQL, HTML, CSS

Data & ML: Pandas, NumPy, statistical modeling, feature engineering, NLP, deep learning, LLM fine-tuning, RAG pipelines

Databases & APIs: MySQL, NoSQL, ChromaDB, REST API

DevOps & Cloud: Docker, Kubernetes, Git

Soft Skills: Communication, Teamwork, Collaboration, Problem Solving, Troubleshooting
